DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on December 17, 2004 has been entered.

Allowable Subject Matter

Claims 1-12 are allowed in view of the prior art.

The following is an examiner's statement of reasons for allowance:

As for claims 1 and 2, the prior art of record, taken either alone or in combination, fails to disclose or render obvious a wavelength reference apparatus for use in calibrating a device comprising a tunable Fabry-Perot filter or a tunable VCSEL and its corresponding method, in combination with the rest of the limitations of the above claims.

With further regard to the above claims, the applicants' arguments filed in conjunction with the RCE of December 17, 2004 lay out detailed reasons for the allowability of the claims over the prior art. In particular, the prior art of record fails disclose the tuning of the tunable Fabry-Perot or VCSEL by varying the tuning voltage applied to the device in a manner such that the known transmission wavelengths of the LED and etalon in the device are correlated to counterpart tuning voltages in order to calibrate the device, in combination with the rest of the elements, limitations, and method steps of the related claims.
